Retaining Walls

What is Retainer-Rock®

The Retainer-Rock® retaining wall system is made from durable concrete at our production facilities.

Retainer-Rock® is a large engineered interlocking concrete block that creates a stunning retaining wall that requires the minimum of maintenance and enhances any area, adding value and protection.

Available in two finishes, Cobblestone and Liscio Stone, Retainer-Rock® improves land efficiency by protecting homes and infrastructure and is aesthetically pleasing.

Our concrete blocks are delivered ready to build, resulting in leaner construction and little to no waste.

Retainer-Rock® has been designed for conformance to BS EN 15258.

Benefits of Retainer-Rock®

Cost effective

We believe it to be the most competitive big block walling system on the market

Fast to build

Each block has 0.5m² face resulting in rapid construction using a machine and two operatives

Simple to build

An easy and effective block system to install

Aesthetically pleasing

A choice of two attractive face designs

Straight or curved walls from standard blocks

No waiting for special products

Readily available

Straight from our UK factories

Innovative

First product of its kind in the UK

Dry laid

Making it easy and clean to install in any weather

Block textures

Cobblestone

The Cobblestone face has six smaller, individual blocks on one face - giving it a more natural stone feel.

The wall has a more consistent look that offers customers the structural capabilities of a concrete block retaining wall with a look that blends effortlessly with local surroundings.

Liscio

The Liscio Stone face creates a sleek look that is perfect for projects that require a more modern retaining wall finish.

The contemporary aesthetic offers a distinctive look that can improve the overall aesthetic look of your project, delivering an attractive, cost-effective complete walling system.
