

Sustainability Policy Statement

Elite Precast Concrete Limited is committed to promoting sustainability. Concern for the environment and promoting a broader sustainability agenda are integral to EPCL's professional activities and the management of the organisation. We aim to follow and to promote good sustainability practice, to reduce the environmental impacts of all our activities and to help our clients to do the same.

Our Sustainability Policy is based upon the following principles:

- To comply with, and exceed where practicable, all applicable legislation, regulations and codes of practice,
- To integrate sustainability considerations into all our business decisions,
- To ensure that all staff are fully aware of our Sustainability Policy and are committed to implementing and improving it,
- To minimise the impact on sustainability of all office and transportation activities,
- To make clients and suppliers aware of our Sustainability Policy, and encourage them to adopt sound sustainable management practises,
- To review, annually report, and to continually strive to improve our sustainability performance.

In order to put these principles into practice we will:

- Avoid physical travelling to meetings etc. where alternatives are available and practical, such as using teleconferencing, video conferencing or web cams, and efficient timing of meetings to avoid multiple trips. These options are also often more time efficient, while not sacrificing the benefits of regular contact with clients and partners,
- Reduce the need for our staff to travel by supporting alternative working arrangements, including home working etc.,
- Minimise our use of paper and other office consumables, i.e. by double siding all paper used, and identifying opportunities to reduce waste,

- As far as possible arrange for the re-use or recycling of office waste, including paper, computer supplies and redundant equipment,
- Reduce the energy consumption of office equipment by purchasing energy efficient equipment and good housekeeping,
- Purchase electricity from a supplier committed to renewable energy. Seek to maximise the proportion from renewable energy sources, whilst also supporting investment in new renewable energy schemes,
- Ensure that timber furniture, and any other timber products, are recycled or from well-managed, sustainable sources and are FSC certified,
- Purchase fair trade and/ or organic beverages,
- Undertake voluntary work with the local community and/ or environmental organisations and make donations to see to offset carbon emissions from our activities,
- Ensure that any Subcontractors, Suppliers or Designers that we employ take account of sustainability issues,
- Strive to achieve a more paperless office.

Sustainable Aggregates Procurement

In line with the commitment to promote sustainability and minimise the environmental impact of our activities. EPCL will endeavour to procure aggregates that have been responsibly sourced.

- When sourcing aggregates, preference will be given to recycled or secondary aggregates, wherever permissible by contract specification.
- Where suitable recycled or secondary aggregates are not available, we will require the supplier to provide evidence to demonstrate the aggregate was responsibly sourced.

Richard Doody

Company Director
