

# Elite Concrete technical specifications

## Legato – overturning on a single block

**R** = 2400kg

**Restoring moment...**

$2400 \times 0.35 = 840\text{kg}$

**Maximum pulling force...**

$? \times 0.75 = 840$

Therefore ? = 1120kg

*For further information or advice,  
please contact our partner company  
who are specialists in concrete block  
erection techniques...*
